JOURNAL OF APPLIED MECHANICS AND TECHNICAL PHYSICS

Volume 34, Numbers 1-6, 1993

(A translation of *Prikladnaya Mekhanika i Tekhnicheskaya Fizika*)

Engl./Russ.

Volume 34, Number 1, January-February, 1993

Modeling of Diffusion and Heat Conduction Effects on the Variation of Hydrodynamic Parameters during Excitation of Molecular Oscillations by Resonance Radiation - V. I. Grabovskii and A. M. Starik	1	3
Comparison of Models with Different and Identical Vibrational Temperatures of Molecular Components - V. G. Shcherbak	9	12
Numerical Modeling of Laser Shock Waves in Condensed Media - N. V. Bugrov and N. S. Zakharov	15	18
Formation of a Shock Wave at the Boundary of a Local Supersonic Zone - S. A. Shcherbakov	21	24
Theoretical Models of Detonation of a Flat Layer of Condensed Explosive with Diminishing Denisty - É. É. Lin, É. N. Pashchenko, and B. P. Tikhomirov	28	32
Effectiveness of Attenuating Shock Waves in Channels by Various Methods - S. M. Frolov	31	34
Mathematical Model of Interaction of Solid Bodies with Soil upon Their Relative Displacement - K. S. Sultanov	37	40
Numerical Modeling of the Interaction of a Water Drop with a Strong Air Shock Wave - V. S. Surov and V. M. Fomin	45	48
Steady Supersonic Flow of a Vibrationally Excited Gas around Thin Bodies - A. N. Bogdanov and V. A. Kulikovskii	51	54
Effect of External Conditions on the Formation of Pressure Pulsations on a Target Irradiated by a Laser - N. M. Bulgakova and L. I. Kuznetsov	62	65
Study of the Turbulent Flow of a Gas over Long Blunt Bodies in a Viscous Shock Layer - I. G. Eremeitsev, G. S. Zhuravleva, and N. N. Pilyugin	66	69
Circulating and Jet Flows Formed in the Atmosphere during the Rise of Two Large-Scale Thermals - V. A. Andrushchenko, A. A. Gorbunov, M. V. Meshcheryakov, and L. A. Chudov	72	75
Field of Long Internal Lee Waves in a Plane-Parallel Shear Layer - V. E. Veden'kov	79	83
Upstream Generation of Solitons: Numerical Analysis of the Dependence on Key Parameters - B. E. Protopopov	85	88
Influence of the Outer Feedback Loop Parameters on the Free Oscillations of the Flow of an Underexpanded Jet Past a Finite Obstacle - S. G. Mironov	90	94
Predominantly Unidirectional Motion of a Compressible Solid Body in a Vibrating Liquid - V. L. Sennitskii	96	100
Analytical Solution of the One-Dimensional Problem of Moderately Strong Evaporation (and Condensation) in a Half-Space - A. V. Latyshev and A. A. Yushkanov	97	102
Instability of Flexural Vibrations of Plates in a Turbulent Boundary Layer - V. P. Reutov	104	108
Estimate of the Carrying Capacity of Structures under Arbitrary Flow Conditions - R. A. Kayumov	111	115
Calculation of the Dynamics of a Flexible Circular Plate on a Linearly Deformable Base - O. D. Pryakhina, V. V. Satarova, and O. M. Tukodova	117	121
Dynamic Strength in Explosive Loading for Shells Made of Oriented Fibrous Composites (Review) - A. G. Fedorenko, M. A. Syrunin, and A. G. Ivanov	123	126
Spalling Failure in a Polymer Cylinder on Unsymmetrical Pulse Loading - A. V. Ostrik and V. P. Petrovskii	128	133

	Engl.	Russ.
Method for Obtaining a Regular Structure in the Deformable Region of a Continuum - A. P. Bobryakov and A. F. Revuzhenko	132	137
Joint Flow of a Powder Matrix and Reinforcing Mesh under Plane Deformation - L. R. Vishnyakov, S. E. Aleksandrov, and L. I. Feodos'eva	138	144
Calculation of the Residual Stresses in Welded Joints of Hard Alloys with Steels by the Bounary Elements Method - V. N. Milenin, I. A. Filimonenko, and L. I. Shkutin	144	150
Effect of Electron Transfer on the Cold Resistance of the Near-Seam Zone in Electric Arc Welding - Ya. S. Semenov, M. N. Sivtsev, and A. A. Argunova	148	154

Volume 34, Number 2, March-April, 1993

	Engl.	Russ.
Voltage-Current Characteristics of a Cylindrical Langmuir Probe in a Slowly Moving Plasma - Z. M. Egorova and A. V. Kashevarov	155	3
Propagation of a Spherical Shock Wave in Sandy Soil - N. N. Gerdyukov, A. G. Ioilev, and S. A. Novikov	161	10
Pressing Thin-Walled Tubing from Powdered Material - S. E. Aleksandrov and L. R. Vishnyakov	162	12
Numerical Analysis of Spallation Failure of Thin Plates under Shock Deformation - I. A. Volkov	169	19
Propagation of Shock Waves in Polydisperse Gas Suspensions - A. G. Kutushev and S. P. Rodionov	173	24
Theoretical and Experimental Modeling of Railgun Operation - V. B. Zheleznyi, A. V. Zagorskii, S. S. Katsnel'son, A. V. Kudryavtsev, and A. V. Plekhanov	180	32
Calculation of Flows with Separation, Heat Transfer, and Swirl by Means of Boundary-Layer Equations - V. I. Vasil'ev and S. V. Khokhlov	184	36
Modernization of Turbulence Models for Axisymmetric Jet Flow - V. E. Kozlov	190	43
Weakly Disturbed Steady Transonic Flows of a Vibrationally Relaxing Gas - A. N. Bogdanov and V. A. Kulikovskii	196	48
Nonlinear Flutter of Plates in the Turbulent Boundary Layer of a Weakly Compressible Flow - V. P. Reutov	205	58
Optimum Wing Shapes in a Hypersonic Nonequilibrium Flow - V. N. Golubkin and V. V. Negoda	212	66
Inverse Boundary Value Problems of Aerohydrodynamics by means of the Methods of Numerical Optimization - A. M. Elizarov and E. V. Fedorov	219	73
Resonant Growth of Perturbations in a Supersonic Jet - N. A. Zheltukhin and N. M. Terekhova	227	82
The Characteristics of Inertial Resonances in a Rotating Liquid - V. G. Makarenko	233	89
Low-Frequency Characteristic Acoustic Oscillations in the Noncirculating Part of a Hydraulic Turbine - V. B. Kurzin	239	96
Evolution of a System of Nuclei Growing in the Diffusion Regime with Fluctuating Rates - Yu. A. Buevich and A. O. Ivanov	247	106
Thermodynamic Properties and Thermal Equations of the State of High-Pressure Ice Phases - V. E. Chizhov	253	113
Vibrations of an Orthotropic Half-Plane with a Cavity - A. O. Vatul'yan and I. A. Guseva	263	123
Parametric Instability in the Oscillations of a Body Moving Uniformly in a Periodically Inhomogeneous Elastic System - A. I. Vesnitskii and A. V. Metrikin	266	127
Stability of an Eulerian Rod. Nonlinear Analysis - T. A. Bodnar'	272	134
Stability of an Eulerian Rod - T. A. Bodnar'	280	141
A Structural Approach to Describing Creep in a Fiber-Based Soft Composite - B. S. Reznikov and I. Yu. Shalaginova	289	149
Initial Transcritical Behavior in a Compressed Rod under Creep Conditions - M. N. Kirsanov	292	152

Volume 34, Number 3, May-June, 1993

Erosion of Alloyed Electrodes in a Supersonic Channel - M. G. Musaev	297	3
Thermal Breakdown in a Heating Filament - A. P. Aldushin	300	5
Flow Past a Slim Body of Revolution of a Stationary Supersonic Flow of a Vibrationally Excited Gas under a Small Angle of Attack - A. N. Bogdanov and V. A. Kulikovskii	304	11
Action of Wind Gusts and Weak Shocks on an Airfoil in a Transonic Stream - A. S. Fonarev	313	20
Calculation of the Movement of a Twisted Flow of a Gas Suspension about the End of a Semi-Infinite Cylinder - I. Kh. Enikeev	319	27
Interaction of a Shock Wave with a Boundary Layer - V. I. Bergel'son, Yu. N. Kiselev, V. A. Klumov, I. V. Nemchinov, T. I. Orlova, V. B. Rozhdestvenskii, and V. M. Khazins	323	32
Pressure Field and Resistance of a Single Cavity with Sharp and Rounded Edges - V. I. Terekhov, S. V. Kalinina, and Yu. M. Mshvidobadze	331	40
Unstable States of a Weightless Viscous Fluid Layer in a Rotating Cylindrical Vessel - L. G. Badratinova	339	50
Development of Separation in the Region where a Shock Interacts with a Turbulent Boundary Layer Perturbed by Rarefaction Waves - A. A. Zheltovodov, É. Kh. Shilein, and C. C. Horstman	346	58
Optical and Acoustic Observations of Stratified Flow behind a Cylinder - V. E. Prokhorov, Yu. D. Chashechkin, and I. V. Voeikov	354	68
Nonlinear Problems of Cavitation Breakdown of Liquids under Explosive Loading (Review) - V. K. Kedrinskii	361	74
Quasistatic and Wave Descriptions of Elastic Body Loading - A. V. Dubovik	378	91
Numerical Modeling of Petroleum Heating and Filtration in a Plate under the Action of High-Frequency Electromagnetic Radiation - A. A. Kislitsyn	382	97
Forced-Convection Heat Transfer from a Heated Surface in a Cavity Formed by Two High Fins - A. I. Gnyrya, V. I. Terekhov, S. P. Tret'yakov, and N. I. Yarygina	387	103
Coupled Convective Heat Transfer from Annular Fins in Transverse Flow - V. G. Gorobets	392	108
Effect of Filler-Particle Size on the Cleavage Strength of Elastomers - G. I. Kanel', Z. G. Tolstikova, and A. V. Utkin	399	115
Relations of the Nonlinear Theory of Three-Layered Shells with Layers of Variable Thickness - S. V. Andreev and V. N. Paimushin	403	120
Application of the Method of Influence Functions in Problems of the Theory of Cracks for Anisotropic Plates - V. N. Maksimenko	410	128
Fracture Toughness of Materials under Dynamic Loading - Yu. I. Meshcheryakov and G. G. Savenkov	419	138
Calculation of the Stress-Strain State of Bent Annular Plates taking account of Material Damage during Creep - V. A. Zaev and A. F. Nikitenko	423	142
Nonequilibrium Kinetic Transitions in Solids as Mechanisms of Local Plastic Strain Localization - O. B. Naimark and O. V. Ladygin	427	147
Calculation of the Evolution of Plastic Yielding at the Tip of a Crack and Related Phenomena - D. N. Karpinskii and S. V. Sannikov	433	154
Deformation and Stability Loss of a Part of the Atomic Chain at the Tip of a Crack - V. M. Kornev and Yu. V. Tikhomirov	439	160
Solution of Steady-State Problem of Gas Chromatography - V. S. Synakh	449	172

Volume 34, Number 4, July-August, 1993

Analysis of Energy and Spectral Characteristics of a Gasdynamic Laser with N_2-DCl Mixing - N. G. Dautov and A. M. Starik	455	3
Numerical Analysis of a Plasma Jet in a Magnetic Field - V. I. Ermilin, V. K. Kolesnikov, and V. G. Petrov	460	9
Electric Forces on a Circular Cylindrical Inclusion at the Surface Separating Two Dielectrics - Yu. P. Emetz, Yu. V. Obnosov, and Yu. P. Onofriichuk	465	14
Generation of Electrical Pulses during Formation and Development of Current-Driven Instabilities in Plasmas - P. I. Zubkov	473	24
Drop Evaporation behind Shock Waves in a Dry Foam - A. B. Britan and N. M. Kortsenshtein	480	32
Shock Wave Screening by Layers of a Vapor-Gas-Drop Mixture - A. G. Kutushev	486	38
Change in the Shape and Characteristics of a Burning Body in Hypersonic Flow - S. Yu. Menzhinskii and N. N. Pilyugin	492	46
An Investigation of the Compressibility of Sandy Soil under Impact-Wave Loading - N. N. Gerdyukov, A. G. Ioilev, A. D. Kovtun, Yu. M. Makarov, and S. A. Novikov	500	55
Nonstationary Flow of an Underexpanded Jet around an Unbounded Obstacle - G. F. Gorshkov, V. N. Uskov, and V. S. Favorskii	503	58
The Theory of Resonance Interaction of Tollmien-Schlichting Waves - A. P. Khokhlov	508	65
Comment on Current Version of A. P. Khokhlov's Article "The Theory of Resonance Interaction of Tollmien-Schlichting Waves" - V. I. Zhuk and E. D. Terent'ev	516	74
Effect of Polydispersion on Sound Propagation in Gas Mixtures with Vapor and Liquid Drops - D. A. Gubaidullin and A. I. Ivandaev	517	75
Effect of the Motion Inside a Liquid Drop on Its Rise in a Vertical Tube - P. K. Volkov	524	83
Finned Cylinder in Supersonic Flow - G. I. Maikapar	533	94
Circulatory Flow in the Inter-Jet Zone of a System of Free Turbulent Jets - T. A. Zhakataev	535	97
Experimental Investigation of the Motion of Bodies in a Fluidized Bed - E. A. Mikhailenko and S. P. Khurs	538	99
Experimental Study of the Force of Internal Waves Acting on a Stationary Sphere - E. V. Ermanyuk	543	103
The Spectrum of Normal Oscillations of an Elastoplastic Medium with Dissipation - V. L. Popov and N. V. Chertova	547	108
Nonlinear Bending of Toroidal Shells of Arbitrary Transverse Cross Section Loaded with Internal Pressure - V. V. Kuznetsov and S. V. Levyakov	551	112
Vibrations of a Cantilevered Piezoceramic Plate with a Corrugated Intermediate Layer - A. O. Vatul'yan, A. V. Nasedkin, and A. S. Skaliukh	557	118
Phenomenological Model of Creep under Variable Loads - V. S. Namestnikov	562	123
Dissipative Mesoscopic Structures in Plastic Deformation - V. V. Neverov	566	128
Effect of Initial Failure Rate of the Formation of a Spalling Pulse - A. V. Utkin	578	140
Correlation of Local Strength Gradient Criteria in a Stress Concentration Zone with Linear Fracture Mechanics - M. A. Legan	585	146
Dissipative Processes in Crystals with Dislocations - B. Ya. Lyubimov and L. V. Matveev	593	155

Volume 34, Number 5, September-October, 1993

Ion-Sound Wave Structure in a Point Explosion - V. A. Pavlov and I. R. Smirnovskii	599	3

	Engl./Russ.	
Interaction between a Shock Wave and a Jet Draining into a Supersonic Cocurrent Flow with Lesser Supersonic Velocity - I. S. Belotserkovets and V. I. Timoshenko	605	10
Numerical Modeling of Mach Reflection for Solitary Waves - O. A. Serebrennikova and A. M. Frank	610	15
Numerical Study of the Action of a Shock Wave on an Obstacle Screened by a Layer of Porous Powder Material - A. G. Kutushev and D. A. Rudakov	618	25
Elastic Characteristics of Porous Materials - V. V. Polyakov and A. V. Golovin	625	32
Influence of Collisions of Small Particles with Large Particles on the Propagation of Shock Waves in Two-Phase, Two-Fraction Aerosols - T. R. Amanbaev and A. I. Ivandaev	629	35
Spectral Composition of Wave Numbers of Longitudinal Vortices and Characteristics of Flow Structure in a Supersonic Jet - V. I. Zapryagaev, S. G. Mironov, and A. V. Solotchin	634	41
Taylor-Görtler Instability in a Supersonic Jet - N. A. Zheltukhin and N. M. Terekhova	640	48
Stationary Currents in Oscillating Flows in Tubes in the Case of Quasistationary Turbulence - E. I. Permyakov	647	56
Radiation of Internal Gravitational Waves in the Case of Uniform Motion of Sources of Variable Amplitude (The Plane Problem) - V. A. Gorodtsov	653	63
Propagation of a Boundary Disturbance in a Stratified Gas for Arbitrary Knudsen Number - D. A. Vereshchagin, S. B. Leble, and A. K. Shchekin	660	70
Optimizing an Oscillation Absorber in a Combustion Chamber - S. V. Sukhinin and V. F. Akhmadeev	669	79
Numerical Calculation of a Three-Dimensional Laminar Compressible Boundary Layer on Profiled Triangular Wings with Supersonic Front Edges - V. N. Vetlutskii and T. V. Poplavskaya	677	88
Application of the Boundary-Element Method to Calculate Subsonic Flow around a Profile - S. M. Aul'chenko	683	94
Filtration of a Gasified Liquid - V. Sh. Shagapov	686	97
Heat Exchange near the Critical Point of a Body within a Supersonic Two-Phase Jet - A. L. Levin	694	106
General Solutions and Reduction of a System of Equations of the Linear Theory of Elasticity to Diagonal Form - N. I. Ostrosablin	700	112
Analysis of the Sack Problem with Detailed Inclusion of Interatomic Cohesive Forces - V. M. Aleksandrov and B. I. Smetanin	711	122
Simulation of the Thermal Conditions of a Fractured Geothermal Reservoir - S. A. Safonov	716	127
Phenomenological Modeling of Peculiarities of Inclined Crack Initiation - V. A. Dolgorukov and V. N. Shlyannikov	722	132
Determination of Stress Intensity Factors and Crack-Opening Stresses from Jumps in Crack-Edge Displacements - V. N. Maksimenko	725	136
Probe Diagnosis of a Flow of Particles Desorbed from the Surface of a Solid by a Low-Density Plasma Jet - V. Z. Korn and V. A. Shuvalov	733	144
Use of Electron Beam Diagnostics to Investigate Flow of Hydrogen Fluoride Gas - G. G. Hartvich, A. E. Zarvin, V. V. Kalyada, and V. Zh. Madirbaev	739	150

Volume 34, Number 6, November-December, 1992

Dynamics and Spatial Boundaries of Retardation of the Plasma Cloud of an Explosion in a Dipole Magnetic Field - S. A. Nikitin and A. G. Ponomarenko	745	3
Recombination Radiation from a Nonequilibrium Jet of Dissociated Carbon Dioxide		

	Engl.	Russ.
- A. V. Eremin and V. S. Ziborov	752	10
Gas-Dynamic Laser Nozzle-Unit Aerooptics - M. G. Ktalkherman and V. M. Mal'kov	761	20
Particle Production by Electrical Explosion of a Conductor - V. N. Gavrilov and E. A. Litvinov	768	28
Radiation Gas Dynamic Processes in an Explosion Caused by High-Velocity Impact of a Cosmic Body in Mars' Atmosphere - A. V. Dobkin, T. V. Loseva, I. V. Nemchinov, I. A. Trubetskaya, and V. V. Shuvalov	775	35
Stability of Periodic Excitations for One Model of "Sonic Vacuum" - S. L. Gavrilyuk and V. F. Nesterenko	784	45
Influence of LRE Model Injector Geometry on Excitation of Transverse Gas Oscillations in the Combustion Chamber - B. I. Malinin	788	48
Dispersion Deformation of Optoacoustic Pulses in the Surface Layer of the Ocean - V. D. Kiselev and A. O. Maksimov	796	57
Effect of Finite-Amplitude Waves on the Evaporation of a Liquid Film Flowing down a Vertical Wall - Yu. Ya. Trifonov	802	64
Thermocapillary Convection in Floating-Zone Melting - I. V. Belova and G. B. Volkova	809	72
A Limiting Regime of Crystallization of a Polydisperse System from Solutions - A. I. Moshinskii	813	75
Solutions of Leibenson's Equation with Periodic Boundary Conditions - M. B. Éntel' and S. F. Pimenov	821	84
Turbulent Mass Transfer in the Flow of a Gas Suspension in a Potential Force Field with Gas Injection/Suction through Porous Channel Walls - I. V. Derevich	825	87
Modeling of Radiation-Convection Heating of Cohesive-Soil Granules in Low-Temperature Plasma Flows - A. L. Burka and V. N. Efimenko	831	94
Nonlocal Measures of Finite Deformations - A. F. Revuzhenko	835	98
Algorithm for Solving Plasticity Problems by the Finite-Element Method - V. N. Solodovnikov	843	106
Construction of the Creep Equations of Materials with Allowance for the Softening Stage in Uniaxial Deformation - V. N. Maklakov	847	109
Longwave Approximation in the Theory of Unidirectional Composites - A. M. Mikhailov	853	116
Model of a Porous Material Considering the Plastic Zone near the Pore - S. P. Kiselev and V. M. Fomin	861	125
Hyperbolic Modification of the Navier-Stokes Equations - B. G. Kuznetsov	870	133
A Model of the Dynamic Failure of the Fuel Element of a Reactor with the Uncontrolled Introduction of Positive Reactivity - R. M. Aksenov, O. V. Kovalenko, and V. K. Sirotkin	878	142
Stressed State of Ferromagnetic Plate with Cracks in the Presence of Strong Magnetic Field - L. A. Fil'shtinskii, E. M. Kravets, and V. A. Khvorost	884	147
